REMARKABLE POINTS ON THE MARKET

The market closed the last day of the week quietly as main indexes struggled around reference and the liquidity also dropped. The market was completely controlled by droppers. However, sellers weren't really fierce, and the support from some large-cap codes, especially VCB and MSN helped the index balancing again and it closed with a light drop. Besides, some groups gained remarkable today like sugar, insurance, and aqua products.

TECHNICAL POINT OF VIEW

In technical term, VN-Index dropped slightly. The volume stayed below 10 and 20-session average, showing lower selling pressure. However, the index still stayed below MA5, and MA20 dropped negatively, showing that short-term dropping pressure is still there. Meanwhile, MACD still stayed below Signal, maintaining selling sign, and -DI stayed above +DI, showing that correcting pressure is still there. Therefore, the index might still see risk of dropping to support level of 1,000 – 1,020 points (old bottom of March). For HNX, HNX-Index also dropped slightly. The index still moved within a small range around MA5, 20, and 50 that are meeting and flat, and ADX stayed below 20, and two DI met, showing that the movement trend is not clear and tended to be Sideway within a range of 200-215 points. In general, the market still showed weakening sign after the drop on May 5. Therefore, investors should keep a safe weight to limit risks from the market.
