REMARKABLE POINTS ON THE MARKET

The market saw an emotional reversing session. In the morning, there wasn't any remarkable piece of negative news but the market suddenly dropped with droppers taking complete control. Meanwhile, bottom-catching demand was cautious so the liquidity was low in the first half of the day. However, the market completely reversed after lunch break. From dropping by over 30 points, VN-Index recovered strongly before closing in a light green. In which, securities gained the most today. Besides, some other impressive gaining groups were retail, banking, insurance, industrial park, and aviation.

TECHNICAL POINT OF VIEW

In technical term, VN-Index saw another gain. The volume was above 10 and 20-session average, showing positive cash flow. Not just that, the index formed another base-withdraw candle at support around MA50, showing better chance of recovering, and the index might prolong the gaining chain in the next few sessions. However, the index still saw pressure from MA5, and MA5 differentiated negatively from MA20, showing that short-term dropping trend is still there and this gain might only be within a technical recovery of 3-5 sessions, with close resistant around 1,200 points or further on MA20. Therefore, investors should be cautious with high-price purchases. For HNX, HNX-Index saw similar situation. It also gained but hasn't surpassed MA20, and MACD dropped to below Signal, maintaining selling sign, and the index showed effort for technical recovering to challenge resistant around 242 points (MA20). In general, the market is still on a Bull trap after the gain on August 22. Therefore, investors shouldn't rush to sell and lower the weight when Bull trap showed sign of weakening.
