REMARKABLE POINTS ON THE MARKET

The market was in red on Friday. Selling pressure existed on many pillars which was the main reason for the market's drop. There were 23 codes in VN30 closing below reference. However, there were also some groups that gained impressive like sea products, sugar, and securities. In which, sea products gained the most as investors expected this group to be benefited from China forbidding import from Japan. For foreign trade, they returned to net selling strongly today with highest net selling value in 9 recent sessions.

TECHNICAL POINT OF VIEW

In technical term, VN-Index dropped again. The volume stayed below 10 and 20-session average, showing cautious cash flow. Not just that, the index still saw pressure from MA20, and +DI stayed below -DI, showing that short-term dropping trend is still there. Moreover, MACD stayed below Signal, maintaining selling sign and RSI stayed below Midline, showing that dropping pressure is still in control. Therefore, if the index cannot stay above support level of MA50 in the next few sessions, it will drop to lower support around 1,100 -1,120 points (MA100). For HNX, HNX-Index saw similar situation. The index still saw pressure from MA20 as it couldn't surpass this MA line and dropped again, and MACD dropped to below Signal, maintaining selling sign, showing that short-term dropping pressure is still there and the index might drop to support of 235 points (MA50). In general, the market is seeing short-term correcting pressure after the drop on August 25. Therefore, investors should keep a safe weight to limit risks from general market.
