PMI in August 2023: number of new orders increased for the first time since February

S&P Global's Purchase Manager Index (PMI) of Vietnam in August increased again to above 50 points for the first time in 6 months. At 50.5, higher than 48.7 in July, showing that business conditions in production have improved slightly.

Manufacturers saw higher number of new orders for the first time in 6 months, while number of new export orders also increased after dropping in 5 months. However, the growth speed is light as some reports showed weak demand. Similarly, the production increased again in August, ending 5 months of dropping. However, the growth speed is low.

As number of new orders and production demand increased, the companies raised the buying strongly. This is the first growth in 6 months and it is the strongest growth since September 2022. Therefore, purchase inventory also increased, marking a second growing month in a row. However, job situation was less positive as the companies still hesitate on hiring so number of jobs dropped in the 6th month in a row, and job inventory dropped for the 8th month in a row.

The data in August showed a strong growth on input price, ending 3 months of dropping. Delivering time is shortened in the 8th month in a row as inventory is still enough to satisfy the orders, although input demand increased in August.

Fuel price saw the 6th growth in a row, RON95 is near 25,000 dong

After National Day holidays (September 2) of 4 days, Ministry of Finance and Ministry of Industry and Trade officially announced the oil price management from 15:00 September 5.

In this adjustment, diesel 0.05S increased by 290 dong to 22,640 dong/litre. Meanwhile, gasoline increased by 510 dong to 22,810 dong/litre; FO dropped by 280 dong to 17,700 dong/kg.
