REMARKABLE POINTS ON THE MARKET

The market gained further on Monday. The excitement appeared from the morning as pillar-pulling cash flow was triggered early so VN-Index opened with a positive gaining gap. At the same time, the liquidity in the first half also increased remarkably. After lunchbreak, the demand saw sign of weakening so VN-Index shook and sometimes dropped to reference. The market was also balance between gainers and droppers. However, with an explosion at the end on some banking and real estate pillars, VN-Index successfully closed at 1,160 points. Besides, a few other groups also gained remarkably today like securities, cement, plastic, and coal. For foreign investors, the pressure was still there with the 5th net selling session in a row.

TECHNICAL POINT OF VIEW

In technical term, VN-Index saw the 7th gain in a row. The volume stayed above 10 and 20-session average, showing positive cash flow. Not just that, the index still closed above MA5, and MA5, 20, and 50 still differentiated positively, showing that short-term recovering trend is still there. Moreover, MACD increased to above Signal, maintaining buying sign and RSI increased to 71, showing that gaining trend is quite strong, and the index might move to challenge sentimental level of 1,200 points or further on 1,250 points (peak in September 2023). For HNX, HNX-Index saw similar situation. It also gained and surpassed MA100, and MA5 still differentiated positively from MA20, showing that recovering trend is getting stronger and the index might move to challenge resistant level of 139 points (peak in October 2023). In general, the market is still on recovering trend after the gain on January 8. Therefore, investors might continue on short-term surfs, having priority on good-fundamental codes with positive Q4 profit forecast.
